

Centre for Environmental Training

# Erosion and Sediment Control Sydney, NSW

22-25 November 2022

International Erosion Control Association Approved Professional short course training in Australasian best practice in Erosion and Sediment Control

in conjunction with

## Erosion and Sediment Control

### Workshop 1: Fundamentals of Erosion and Sediment Control

Workshop 1 provides training for people responsible for the selection, installation, inspection or maintenance of temporary and permanent erosion and sediment control measures.

The workshop covers the fundamental principles that underpin erosion and sediment control. No prior knowledge is required.

This workshop provides a practical perspective and is geared towards anyone wanting a sound knowledge of erosion and sediment control without going into detailed calculations and design aspects.

**Topics include:** the theory of soils and soil conservation; how, when and why to use various erosion and sediment control products or practices, tips for conducting inspections of erosion and sediment controls on sites, plus real-world examples of reading and understanding erosion and sediment control plans.

Those planning to attend Workshops 2, 3 or 4 should attend this workshop first.

Participants should bring a paper or electronic copy of the "Blue Book" *Managing Urban Stormwater: Soils and Construction*, (Landcom, 2004), a pen, paper and some highlighting markers. The "Blue Book" can be downloaded at: <https://www.environment.nsw.gov.au/research-and-publications/publications-search/managing-urban-stormwater-soils-and-construction-volume-1-4th-edition>

#### Who should attend?

- Site construction personnel
- Developers and Consultants
- Local and State Government Officers

### Workshop 2: How to Use the Blue Book

Workshop 2 is designed for staff who need to understand key technical and management issues relating to erosion and sediment control in the urban environment in NSW.

The workshop gives a broad overview of the material contained in the "Blue Book". It introduces RUSLE, the

Revised Universal Soil Loss Equation, as a tool for assessing erosion risk at a site under different management conditions.

This workshop is designed to guide participants through the "Blue Book" so they can apply it to their plans and sites. We look at what site issues should be considered when planning for erosion and sediment control and how they might affect your proposed works.

**Topics include:** site assessment and site planning, effective methods of erosion and sediment control and how to manage and inspect a work site for erosion and sediment control.

Participants should bring a paper or electronic copy of the "Blue Book".

#### Who should attend?

- Developers and Consultants
- Civil and Environmental Engineers
- Local Government Officers
- Others wishing to update their knowledge in line with the current edition of the "Blue Book"

### Workshop 3: Water Management on Construction Sites

Workshop 3 trains those responsible for the selection, design or review of temporary and permanent erosion and sediment control measures on urban construction sites.

The workshop is geared mainly for consultants who prepare and regulators who review Soil and Water Management Plans. An engineering background is not required. This workshop is equally applicable to both engineers and non-engineers.

Participants will gain a sound understanding of the design of various measures described in the "Blue Book" such as sediment basins, diversion structures and catch drains.

**Topics include:** the theory and application of water management on construction sites, how to size and design sediment basins and how to design catch drains and diversion structures.

Participants should have attended Workshop 2 first. Participants should bring a paper or electronic copy of the "Blue Book", a calculator, notebook and pen and a laptop computer. Software will be provided.

## Erosion and Sediment Control

### Course Enrolment Form (3241)

If you would like to enrol in this course, please complete your details below or on-line at:

#### PLEASE REGISTER ME FOR:

Workshop 1: Fundamentals of Erosion and Sediment Control **22 November 2022**

Workshop 2: How to Use the Blue Book **23 November 2022**

Workshop 3: Water Management on Construction Sites **24 November 2022**

Workshop 4: Preparing and Reviewing Plans for Soil and Water Management **25 November 2022**

One workshop	\$800 + GST
Two workshops	\$1,530 + GST
Three workshops	\$2,135 + GST
Four workshops	\$2,655 + GST

Course fee includes comprehensive course notes, software as indicated, lunches and morning and afternoon teas. Please bring required materials as noted in the brochure.

**Course Venue:** Hotel Urban, 194 Pacific Highway, Greenwich.

**Times:** 9.00 am – 5.00 pm each day.

**Payment Terms and Conditions:** Payment can be made by EFT or credit card (a 2.6% surcharge applies). Places will be confirmed upon receipt of payment into our account. If you are unable to attend a course, you will need to advise us of cancellation at least 14 days prior to the course otherwise no refund will be provided. A full refund will be given where notice of cancellation is given more than 14 days before the course. 10% administration charge is applicable to all course transfers due to illness/non-attendance.

## Professional Training in Erosion and Sediment Control

These workshops provide a comprehensive and integrated program of instruction and exercises. Workshops are approved by the International Erosion and Sediment Control Association (IECA). [IECA-Approved](#) training is delivered by providers who are regarded as technically proficient in erosion and sediment control. Training that is "IECA Approved" should always accord with recognised best-practice techniques.

### Further E&SC Courses

These workshops:

Workshop 1: Fundamentals of Erosion and Sediment Control  
Workshop 2: How to Use the Blue Book  
Workshop 3: Water Management on Construction Sites  
Workshop 4: Preparing and Reviewing SWMPs/ESCPs

and for those working in specific industry sectors, specialised Erosion and Sediment Control Courses for:

- **Main Road and Rail Construction and Maintenance**
- **Coal Seam Gas Operations \***
- **Services and Linear Easements**
- **Unsealed Roads \***
- **Mines and Quarries**
- **Waste Landfills \***

along with our very popular courses:

- **Practical Erosion and Sediment Control for the Workforce \* (1-day)**
- **What's in the NSW Blue Book? \* (1-day)**
- **Selecting and Installing Erosion and Sediment Control Measures \* (half-day)**
- **Erosion and Sediment Control for Compliance Inspections \* (1-day)**

can be run as in-house courses at any location.

\* **IECA Approved Training**

**Please contact us to discuss your training requirements.**

**The Centre for Environmental Training**

**197 Main Road**

**Cardiff NSW 2285 Australia**

**Telephone: 02 4954 4997**

**e-mail: [mail@environmentaltraining.com.au](mailto:mail@environmentaltraining.com.au)**

**web: [www.environmentaltraining.com.au](http://www.environmentaltraining.com.au)**

#### Who should attend?

- Consultants
- Environmental Managers
- Regulators responsible for reviewing Soil and Water Management Plans

### Workshop 4: Preparing and Reviewing Plans for Soil and Water Management

Workshop 4 trains personnel responsible for the identification and design of temporary and permanent erosion and sediment control measures on construction sites and for their delineation on a plan.

The workshop pulls together the information presented at Workshops 1, 2 and 3. It is a practical application of the work undertaken at the earlier workshops. This workshop also trains regulators in the necessary skills for review of Soil and Water Management Plans and Erosion and Sediment Control Plans.

Participants will gain a sound understanding of the process involved with the selection, design and placement of a range of typical erosion and sediment control measures suitable for use on construction sites. They will be able to delineate these on a plan following the criteria set out in the "Blue Book". In addition they will be able to review such plans.

**Topics include:** the theory of plan preparation, how to prepare a plan with a guided practice exercise, how to prepare a plan using local examples and how to review Soil and Water Management Plans and Erosion and Sediment Control Plans.

Participants should bring a paper or electronic copy of the Blue Book, a calculator, notebook and pen, and a laptop computer loaded with the software provided at Workshop 3.

#### Who should attend?

- Consultants
- Environmental Managers
- Regulators responsible for review of Consultants' plans
- Others who have attended Workshops 1, 2, and 3
